CERTIFICATES

PGP In Full Stack Software Engineering (01/2023 - Present)

I Have learning in PGP In Full Stack Software Development from NIIT where I have learning Tools and Technologies like . Frontend ,Backend, Database

PERSONAL PROJECTS

Jukebox Application (02/2023 - 03/2023)

- I developed a Java project with user authentication, custom playlists, and advanced search using Java and MySQL. Users can create, modify, and delete playlists, as well as search for songs based on their preferences. It's a feature-rich project enabling personalized playlist management and customization options.

Content Management System(CMS) (04/2023 - 05/2023)

- I have completed a content management system project in which logged in user can add, get, update, delete all product. KEY SKILLS USED: Spring Boot, Angular ,MySQL , MongoDB , HTML , CSS , Bootstrap , Angular material.
